*NORTH Engineering Ltd. is in the following line of business:*

*making the design-technical documentation of the facilities of building construction and civil engineering construction, expert supervision of their execution, consulting, engineering, execution of work.*

*It was founded on the 22<sup>nd</sup> of May 1990 as a privately owned company and currently employs 35 engineers and technicians covering the fields of architecture, civil engineering, water and sewage and energy efficiency. Through outsourcing companies, our longterm partners, we are also covering all other required disciplines for the design and supervision: HVAC, electrical installations, traffic and fire safety.*

*The employees and associates of our company participated in the design and realization of capital industrial buildings, residential complexes, agricultural and hydro-technical facilities, food processing facilities, public buildings, mega and supermarkets and other facilities of public significance.*

*Due to the vast number of realised projects in the table below please find enclosed the summary from the reference list of projects that were completed since the founding of our company.*

### **COMPANY LINE OF BUSINESS AND SUMMARY FROM THE REFERENCE LIST**

NORTH Engineering Ltd. is a company that is in the following line of business: design, engineering, execution of work, research and development and data processing in the field of civil engineering. It was founded on 22<sup>nd</sup> of May 1990 as a privately owned company. Within the company there are two departments: Design and Engineering Department and Research and Development Department.

The main line of business of the Design and Engineering Department is making the design-technical documentation of the facilities of building construction and civil engineering construction, expert supervision of their execution, arranging expert business for the investors – consulting, engineering and execution of work.

The employees and the associates of our company have been involved in design process and realization of capital industrial premises, residential complexes, agricultural and hydro-technical facilities, food processing plants, public buildings, mega and super markets and other facilities of public significance.

Apart from the rich experience and expertise of the employees, the work technology is improved by using the computers and other following equipment which enables us to work using powerful software with wide range of possibilities.

Due to the vast number of realized projects in the table below please find enclosed the summary from the reference list of premises and facilities that were completed since the founding of our company.

Investor	Place of construction	Title and description of the facility/project	Year
TOYO TIRE SERBIA d.o.o. Japan	Indija	Innovation center, A=4.700m <sup>2</sup> . Conceptual design & Urban plan design.	2025
REPUBLIC OF SERBIA	Surčin	Belgrade EXPO 2027, design for execution of the primary and secondary steel structures for the exhibition halls 1, 2, 3, 4, 6 & 7, total roof area in base: A=80.960m <sup>2</sup> .	2025

Our best references are successfully performed design projects and other expert businesses on numerous facilities. We have stated the most important ones. Our wish is that you join the satisfied clients and become the consumer of our services in your and our best interest, as well as help our mutual development. We hope that you have at least got an insight into the business of our company from the north of the Panonian plane, which for that reason, carries the name NORTH Engineering.

Sincerely,

Manager,
